Learning new programming languages

ABOUT ME

I am a self-taught full stack MERN developer with a strong skill set in MongoDB, Express.js, React.js, and Node.js. I am also proficient in HTML, CSS, Sass, JavaScript, Bootstrap, PHP, MySQL, and WordPress. As a developer, I have experience building dynamic and responsive web applications, as well as maintaining and optimizing existing ones. I am constantly learning new technologies and programming languages to improve my skills and stay up-to-date with industry trends.

Project: Goal Tracker App	2023
Technologies used: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Axios, JWT.	
The Goal Tracker App is a web application that helps users track their goals by enabling them to create, read, update, and delete them. It features an authentication system for signing up, logging in, and logging out. The app was built with React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Axios, and JWT.	
live demo of the app at: https://quiet-phoenix-c8dc75.netlify.app/ .
